

Email Setup - Apple iOS

General Setup

- Open Settings.

- Choose **Passwords & Accounts**.

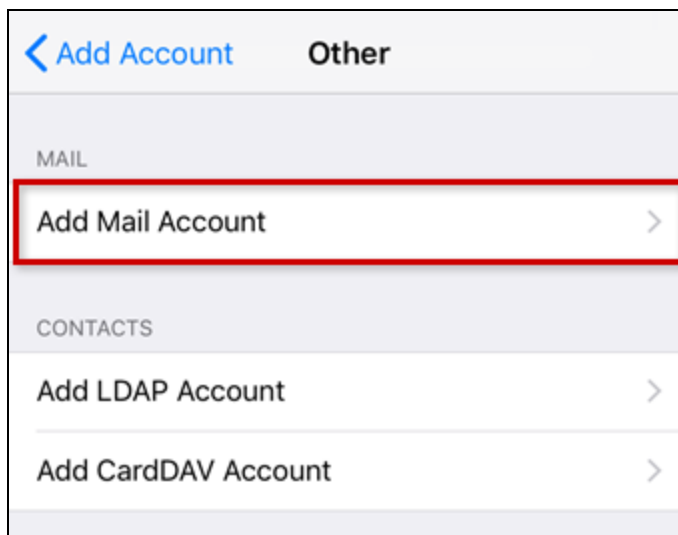

- Tap **Add Account**.

- Choose **Other**.

- Choose **Add Mail Account**.

- Enter your account details and tap **Next**.

The screenshot shows a mobile application interface for creating a new account. At the top, there are three buttons: 'Cancel' on the left, 'New Account' in the center, and 'Next' on the right. Below these buttons is a form with four rows, each representing a different field. The first row is 'Name' with the value 'John Smith'. The second row is 'Email' with the value 'account@example.com'. The third row is 'Password' with a series of black dots and a blue cursor at the end. The fourth row is 'Description' with the value 'account@example.com'. A red rectangular box highlights the entire form area.

FIELD	INPUT
Name	The name others will see when receiving your mail.
Email	The complete email address of your 1&1 IONOS email account.
Password	The password you entered when setting up the 1&1 IONOS email address.
Description	Enter a description for your account here. This information is only used to better differentiate your account from one another.

Server Setup

- Receive your mail using the **IMAP** (recommended) or **POP** protocol by entering the respective host name for Incoming Mail Server.
- Enter the remaining data and tap **Next**.

Cancel **New Account** Next

IMAP POP

Name John Smith

Email account@example.com

Description account@example.com

INCOMING MAIL SERVER

Host Name imap.ionos.com

User Name account@example.com

Password ●●●●●●●●

OUTGOING MAIL SERVER

Host Name smtp.ionos.com

User Name account@example.com

Password ●●●●●●●●

FIELD

INPUT

Hostname `imap.ionos.com` (recommended) or `pop.ionos.com`
