

# Email Setup - Outlook, email clients.

Please note: Many email programs automatically detect your email server details and complete the setup without having to enter the data manually. It is suggested not to manually enter the server settings or adjust them unless you have problems sending and receiving emails.

## Choice of account type

When setting up the account in your email program, you can set up the account using either [IMAP](#) or [POP](#). We recommend using IMAP.

## Access data for your account

SETTING	VALUE
Username	Your complete email address, such as account@example.com
Password	The password to your email address. You can set a new email account password in 1&1 IONOS or if lost or forgotten.

## Account settings for IMAP

SETTING	VALUE
Server address	imap.ionos.com
Port (for SSL)	993
Port (Unsecured)	143

SETTING	VALUE
Server	smtp.ionos.com
Port (for SSL Encryption)	465
Port (TLS/STARTTLS, alternative to SSL)	587

## Account settings for POPs

SETTING	VALUE
Server Address	pop.ionos.com
Port (for SSL Encryption)	995
Port (Unsecured)	110

SETTING	VALUE
Server address	smtp.ionos.com
Port (for SSL)	465
Port (TLS/STARTTLS, alternative to SSL)	587

Please note: Activate the SMTP authentication option for the outgoing mail server (SMTP), not the SPA option.
